

# Connected 2050 Regional Transportation Plan and Sustainable Communities Strategy

## Administrative Modification No. 1

### Administrative Modification Purpose and Overview:

The purpose of Administrative Modification No. 1 is to add an illustrative project to Connected 2050 at the request of Caltrans District 5. The added project is titled "EV Infrastructure" and it supports a Trade Corridor Enhancement Program (TCEP) grant application. Administrative Modification No. 1 does not add new projects to the fiscally constrained project lists. With the addition of this illustrative project, Connected 2050 remains fiscally constrained.

### Changes made via Administrative Modification No. 1:

All changes apply solely to the Connected 2050 Appendices document.

New text and figures are shown in red. Strikethrough text denotes removed text.

<b>CT-IL-29: Electric Vehicle (EV) Infrastructure</b>				
Project Type	Phase	Description	Year	Cost (\$000's)
OTHER	Construction	Design and construct Central Coast Fleet Charging. The project is included in a network of charging hubs to provide critical EV infrastructure to fleets that lack the real estate, electrical capacity, capital or capability to build their own charging facilities. This facility is in the City of Santa Maria.	2026	3,999
